

## New Sidewalk List (Sorted by Priority Rating)

Updated October 1st, 2022

This list shows the locations where residents have requested sidewalks. Locations have been evaluated using the Priority Rating system and ranked accordingly.

Sidewalks are not always constructed in the order they are displayed. Among the factors which affect the order of sidewalk construction are:

- the expected construction timing of other municipal infrastructure upgrades, such as sewer, watermain, or road work.
- the connectivity of placing sidewalks on adjacent streets or to complete a local network, particularly in school zones.
- the budget for the various programs which sidewalks are constructed under.
- engineering and constructability issues, such as the need for property acquisition, bridge or culvert widening, or for stormwater drainage to be redirected.

As the dynamics of each location may change, this list is regularly re-evaluated. Please contact [City staff](#) if you have questions regarding the specific timing of your location.
